EDUCATION

Pennsylvania State University State College, PA
M.S. in Information Science and Technology, Data Sciences Concentration **GPA: 3.95 / 4.0** May 2021
National Taiwan University Taipei, Taiwan
M.S. in Mechanical Engineering(Thermal-Fluid Science) **Ranking: 1 / 19** **Overall GPA: 4.22 / 4.3** Jun. 2012
National Tsing Hua University Hsinchu, Taiwan
B.S. in Power Mechanical Engineering **Ranking: 1 / 53** **Overall GPA: 3.90 / 4.0** Jun. 2010

SKILLS

- **Programming Languages:** Python, HTML, CSS, JavaScript, SQL, C++
- **Tools:** jQuery, Flask, MySQL, MongoDB, React, Amazon Web Service, Alexa Developer Console, Git, Bootstrap, MATLAB, Spotfire, SVN

WORK EXPERIENCE

Cirrus Logic Austin, TX
Fall Intern Sept. 2020 – present
- Define, develop, and acquire software tools using Python in support of silicon validation efforts
- Provide qualification and characterization data to Product Test Engineering and accurately report all test failures using software tracking tools

Penn State University – Crowd-AI Lab State College, PA
Research Assistant May 2020 – Aug 2020
- Built a human-in-the-loop system to enhance Amazon Echo's conversation quality, overall quality score is 3.71/5.0 from 17 users and 88% of users considered it outperformed than Amazon Echo.
- Customized Alexa skill to accurately capture all dynamic phrases in real use cases.
- Implemented web frontend and human worker interface using HTML, CSS, and JavaScript.
- Developed backend system using Python, Flask and MySQL with AWS Lambda and Elasticsearch.

Industrial Technology Research Institute Hsinchu, Taiwan
Industrial Marketing Data Analyst & Project Management July 2012 – July 2019
- Interpreted global trading data, policies, economic, and technology trends of the machine tool industry to make recommendations and offer counsel to the Taiwan government.
- Managed several projects (~$20 million) in smart manufacturing and advanced metrology field.
- Planned and analyzed cost control and project scheduling; Performed risk assessments, strategic planning, and communications across customers and team members.

PROJECTS

Crowdsourcing Restaurants from Food Photograph [*HTML, CSS, jQuery, JavaScript, Python, Flask, MongoDB*]
- Built a web-based automatic crowdsourcing system to allow users to upload food photographs and receive correct restaurant information (90% accuracy) within a few minutes.
- Designed and implemented three different web interfaces for users and Amazon Mechanical Turk (MTurk) workers by using HTML, CSS, jQuery, and JavaScript.
- Developed backend using Python, Flask, and MongoDB to manage HITs on MTurk for data collections in real time manner.

Predict Future Sales (Kaggle Competition) [*Python, Tensorflow, SKLearn, Pandas, Numpy, Seaborn, Matplotlib*]
- Applied data analysis, data preprocessing and feature engineering tasks using Python, Seaborn and Matplotlib.
- Implemented machine learning algorithms such as XGBoost, LSTM, Random Forest, and CNN to get the best prediction model.
- Ranked top 15% on Kaggle leaderboard.

Database Backend Web Application of University COVID-19 Policies [*Python, HTML, CSS, JavaScript, SQL, Flask*]
- Created a web interface to search University COVID-19 policies using HTML, CSS, and JavaScript.
- Implemented backend using Python, Flask, and SQL database.

Statistical Testing for Comparing Machine Learning Algorithms [*Python*]
- Evaluated two hypothesis testing methods, McNemar's test and 5x2cv paired t test, to compare the performance of machine learning classifiers.
- Implemented the statistical testing on four different machine learning classifiers: XGBoost, Random Forest, Support Vector Machine, and Logistic Regression with the wine dataset using Python.
